**ROMEX® JOINTING MORTAR**

## **CONSULT. SUPPLY. TRAIN.**

**PATIOS | DRIVEWAYS | COMMERCIAL SPACES**

For more than 30 years, ROMEX® has been a worldwide leader in the field of synthetic resin pavement jointing mortar products. Our range of permeable jointing mortar products is designed to deal with all pedestrian and vehicular hardscape challenges and guarantee a solid, durable and sustainable paving joint.

ROMEX® jointing employs ROMEX®'s industry-leading resin technologies that are mixed with graded silica sands to create a material that has multiple advantages over any other type of jointing material in the world, including being categorically stronger and more resilient to the forces of nature. We've developed and applied a quality standard for our products that exceeds the levels expected by the industry. This has and continues to provide peace of mind to our customers.

Historically, paved stone surfaces that have been installed without solid joints have shown a significantly shorter life expectancy and have often led to costly rework and renovation. Surfaces that utilise ROMEX® jointing technology can be easily maintained with a pressure washer without risk of damaging the jointing material and possess the unique ability to return stormwater back to the ground thanks to the permeability properties of synthetic resin jointing.

# ROMEX® Permeable Jointing – Pedestrian Loading

We offer a range of products that are straightforward, easy to install and perfect for all pedestrian applications. Our pedestrian rated product line is water permeable, resistant to ants and weeds and pressure washer safe, making annual surface maintenance quick and easy. **Ideal for:** Patios, Pathways & Around the House

## ROMPOX® - FUGENSAND NP + D7000 JOINT STRENGTHENER & SURFACE SEALER

**Features:** All-in-one, eco friendly solid jointing sand solution that is manufactured from natural, raw materials and suitable for all load classes. Thanks to its simple and quick application, the jointing sand, strengthener & surface sealer combination is ideal for narrow joints, especially with interlocking paving stones on patios and driveways as well as in public spaces.

**Available in:** neutral, stone grey, basalt

**Packaging:** FUGENSAND NP - 55 lb bags, D7000 - 1 L / 5 gallon

- Ideal for:**
- Joint widths from 1 mm (1/16")
  - Unbonded construction
  - Patios, Walkways, Driveways, Public spaces

## ROMPOX® - ECOFINE

**Features:** Ready-mixed, sustainable Jointing Mortar perfect for porcelain and sensitive surfaces, made from 98% natural, recycled, or renewable raw materials and produced with solar power. With its easy application, this highly water-permeable jointing mortar is ideal for professionals and DIY homeowners. It leaves a resin-film free finish, is resistant to ants and weeds and is pressure washer safe up to 2,000 psi.

**Available in:** beige, grey, anthracite

**Packaging:** 12.5 kg bucket / 27.5 lb bucket

- Ideal for:**
- Joint widths from 3 mm (1/8") on Porcelain Tile
  - Joint widths from 5 mm on Concrete Pavers
  - Residential Patios & Pathways

## ROMPOX® - D1

**Features:** Light to medium vehicle rated, two-component Jointing Mortar suitable for driveways, parking spaces and all vehicular loading applications up to 7.5 T. Proven resin jointing solution with increased pouring capacity that is self-compacting, water emulsifiable and suitable for 3 mm (1/8") wide joints on all natural stone and concrete surfaces. Resistant to ants, weeds, frost, de-icing salt and is pressure washer safe up to 2,000 psi.

**Available in:** neutral, stone grey, basalt

**Packaging:** 2.5 kg / 5.5 lbs Resin-Set (To be mixed with 55 lb bag of ROMEX® approved filler sand)

- Ideal for:**
- Medium vehicle applications up to 7.5 T
  - Joint widths from 5 mm (1/4")
  - All Natural Stone and Concrete surfaces

## ROMPOX® - EASY

**Features:** The original ready-mixed, easy to use permeable Jointing Mortar is ideal for DIY homeowners and professionals with small jobs. It's designed to be used around the house on patios and pathways and is compatible with all natural stone and concrete surfaces. Resistant to ants, weeds, de-icing salt and is pressure washer safe up to 2,000 psi.

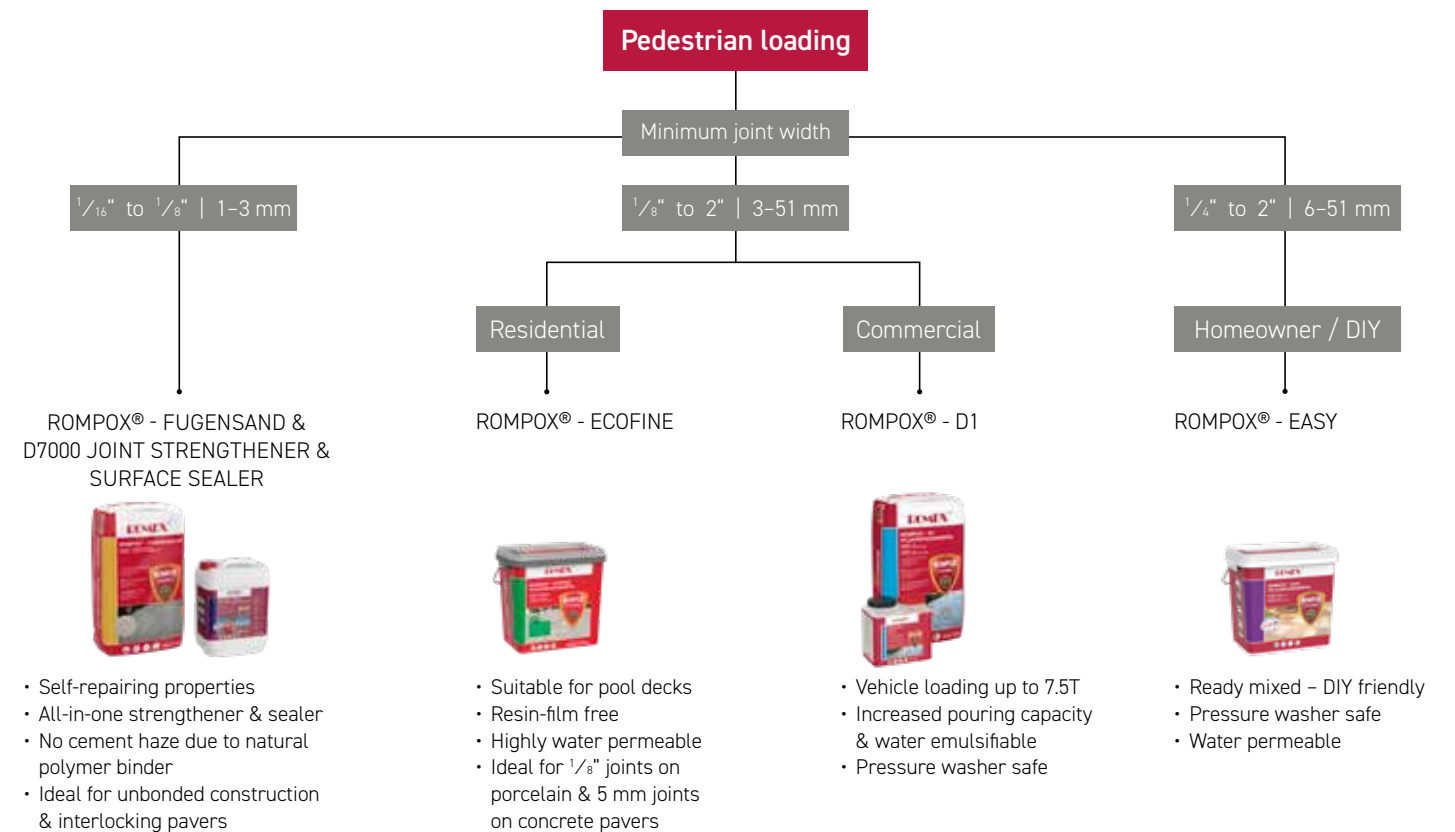

**Available in:** sand-neutral, sand-stone grey, sand-basalt

**Packaging:** 15 kg bucket / 33 lb bucket

- Ideal for:**
- DIY/Homeowner use
  - Joint widths from 5 mm (1/4")
  - Residential Patios & Pathways

# ROMEX® Permeable Jointing Product Selection

ROMPOX® - FUGENSAND NP + D7000 Joint Strengthener & Surface Sealer installed on a concrete interlocking patio

ROMPOX® - ECOFINE installed on porcelain tile residential patio

ROMPOX® - D1 installed on a natural stone commercial plaza

ROMPOX® - EASY installed on natural stone residential patio

# ROMEX® Permeable Jointing – Vehicular Loading

This is a professional line geared towards a range of vehicular loading applications, suitable for residential and commercial projects. Our vehicular rated product line is water permeable, extremely durable and can withstand commercial cleaning vehicles, ensuring long-term surface functionality and performance. **Ideal for:** Driveways, Parking Areas & Commercial Spaces

## ROMPOX® - DRAIN

**Features:** Highly-water permeable two-component Jointing Mortar suitable for driveways, parking spaces and all light vehicular loading applications. Classic resin jointing solution that is self-compacting, water emulsifiable and suitable for all natural stone and concrete surfaces. Resistant to ants, weeds, frost, de-icing salt and is pressure washer safe up to 2,000 psi.

**Available in:** neutral, stone grey, basalt

**Packaging:** 1.8 kg / 4 lbs Resin-Set (To be mixed with 55 lb bag of ROMEX® approved filler sand)

**Ideal for:**

- Light vehicle applications up to 3.5 T
- Joint widths from 5 mm (1/8")
- All Natural Stone and Concrete surfaces

## ROMPOX® - D1

**Features:** Light to medium vehicle rated, two-component Jointing Mortar suitable for driveways, parking spaces and all vehicular loading applications up to 7.5 T. Proven resin jointing solution with increased pouring capacity that is self-compacting, water emulsifiable and suitable for 3 mm (1/8") wide joints on all natural stone and concrete surfaces. Resistant to ants, weeds, frost, de-icing salt and is pressure washer safe up to 2,000 psi.

**Available in:** neutral, stone grey, basalt

**Packaging:** 2.5 kg / 5.5 lbs Resin-Set (To be mixed with 55 lb bag of ROMEX® approved filler sand)

**Ideal for:**

- Medium vehicle applications up to 7.5 T
- Joint widths from 5 mm (1/8")
- All Natural Stone and Concrete surfaces

## ROMPOX® - D2000

**Features:** High strength pavement jointing mortar suitable for public surfaces and capable of supporting heavy traffic loads up to 25 t. ROMPOX® - D2000 is suitable for new jointing installations on squares, roads and paths as well as for the repair of existing paved stone surfaces. The ability to quickly reopen the surface to traffic following makes this pavement jointing mortar unique and suitable for commercial applications.

**Available in:** neutral, stone grey, basalt

**Packaging:** 2.5 kg / 5.5 lbs Resin-Set (To be mixed with 55lb bag of ROMEX® approved filler sand)

**Ideal for:**

- Heavy vehicle applications up to 25 T
- Joint widths from 5 mm (1/8")
- Street/commercial cleaning vehicles

## ROMPOX® - FLEX-JOINT

**Features:** Viscous elastic jointing mortar made of select sands and rubber. Suitable for vehicular rated and unbonded surfaces. Water permeable, self compacting and water emulsifiable during installation. Medium to heavy traffic up to 25 T.

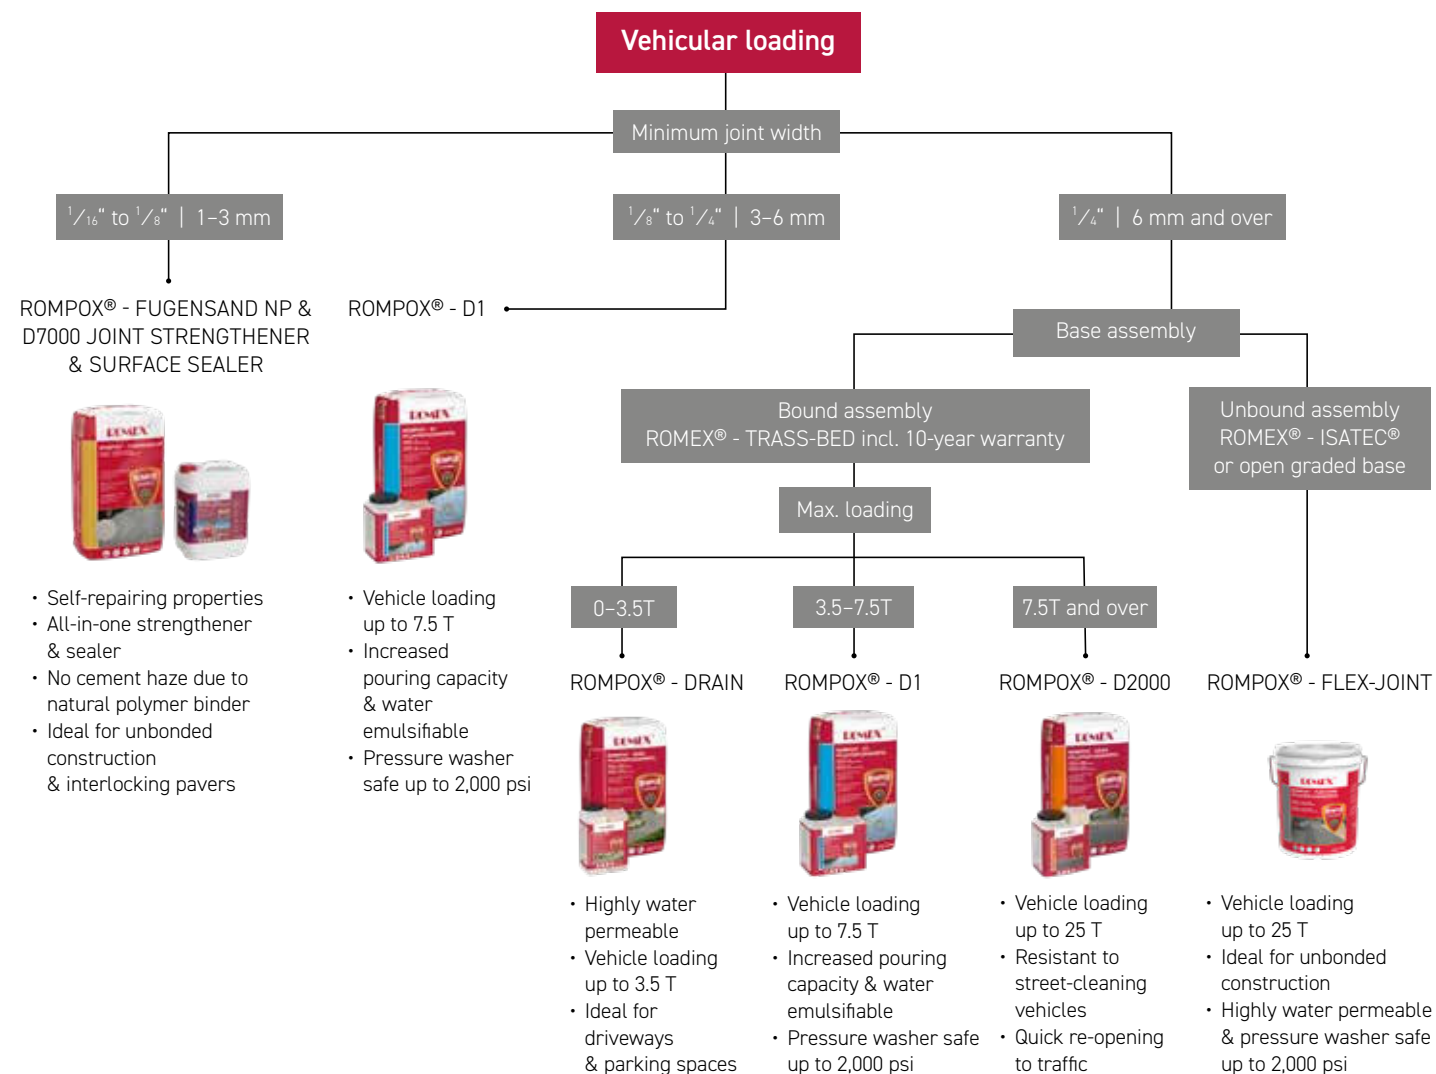

**Packaging:** 25 kg bucket / 55 lb bucket

**Ideal for:**

- Unbonded Construction Methods
- Joint widths from 8mm (3/8") – Narrower joints can be jointed with increased work
- Medium to Heavy Traffic up to 25 T
